

PRESS RELEASE

Lobbach, November 28, 2003

New legal entity formed: AXTAL GmbH & Co. KG

Since its successful launch 18 months ago, the business of AXTAL – Advanced XTAL Products, has grown considerably.

To match the challenges of growth, a new legal entity

AXTAL GmbH & Co. KG

was established now in Lobbach / Germany .

AXTAL GmbH & Co. KG is involved in the Design, Manufacturing, and Sales of piezoelectric and dielectric components and electronic subassemblies. The main focus of the company is on special solutions for customer-specific applications.

This includes:

- Quartz crystals and piezoelectric resonators with novel materials such as Langasite and Gallium Orthophosphate
- Crystal oscillators, in particular oscillators with very wide pulling range, ultra stable precision oscillators, SAW oscillators, and dielectric oscillators
- Quartz filters and other piezoelectric filters to customer specifications, such as antenna filters, wideband filters, linear phase filters etc.
- Piezoelectric sensors, especially for High Temperature applications

The owner and General Manager Bernd Neubig looks back to 28 years of experience in the crystal industry, which includes top management positions in the major Germany crystal companies.

AXTAL GmbH & Co. KG is supported by a worldwide network of representatives.
