European Regulation EU 1907/2006: Regulation, Authorization and Restriction of Chemicals (REACH)

ECHA Candidate List of SVHC <https://echa.europa.eu/candidate-list-table>,

Statement

AXTAL GmbH & Co. KG is a manufacturer of electronic products, and thus has to be classified as so-called „downstream user“. Therefore Article 6 of the REACH regulation, which requires a registration if quantities of one ton or more per year are involved, does not apply.

The products which we are supplying are solely non-chemical products. Moreover and under normal and reasonably foreseeable circumstances of application, the goods shall not release any substances. Therefore, in accordance with Article 7, AXTAL GmbH & Co. KG is neither obligatory for registration nor for the creation of material safety data sheets for its products.

We will immediately inform our customers in correspondence to REACH Articles 7, 31 and 33, if any Substances of Very High Concern (SVHC) in a concentration of > 0.1 mass % (1000 ppm) in our goods will be classified alarming by the European Chemicals Agency ECHA. Based on the current status (SVHC-223) however, we do not expect such an incidence to occur in the foreseeable future.

Independent of that fact, in our own interest and in order to guarantee a high level of product safety for our customers, we are pursuing the realization of REACH on the part of our suppliers of chemistry and prepared material such as manufacturing and processing materials.

Lobbach/Mosbach, March 2022

Bernd Neubig
Managing Director
